the birth of the Prince

The birth of the Prince...

The Prince is a drifter, born to an ordinary family; he is a man without title, without a calling. A Prince in nickname only, he wanders from adventure to adventure in search of fortune.

When he was only a boy, his close family was killed in a war. Since then he has made no lasting ties, or close connections. To him the past is gone and the future will take care of itself. All that matters is now – the thrill of the moment, the next heartbeat, the next death-defying leap.
